PROFILE

Full-stack developer and team lead experienced in building scalable web and mobile applications using Node.js (Fastify/Express), React/Next.js, React Native, and MongoDB. Led backend and product strategy for RealSQ - an offline-first disaster-management platform deployed on GCP and DigitalOcean and coordinated stakeholder engagements with DDMA/KSDMA and Kerala Startup Mission. Skilled in Linux and VPS management, API optimization, database consolidation, and converting Figma designs into pixel-accurate, responsive Uls; focused on delivering stable, user-centered solutions and mentoring small teams.

PROFESSIONAL EXPERIENCE

Team Lead 09/2025 – Present

Kerala Disaster Management Authority, remote

- Leading product and technical strategy for RealSQ, an offline-first disaster management platform that enables real-time tracking of victims, camp resources, and logistics without continuous internet access.
- Manage stakeholder engagement and presentations prepared and presented solution briefs and reports to Wayanad DDMA and KSDMA; currently coordinating approvals with Kerala Startup Mission and planning pilot deployments.
- Aim to reduce response times, minimize resource wastage through smart allocation, and ensure tamper-proof digital registries for accountability.
- MVP developed and deployed by VPS from Digital Ocean

Website Building 04/2026 – 04/2026

Freelance

- Created an animated website for an interior works business, including responsive design and interactive animations.
- Implemented feedback management, basic SEO, and gallery management using Supabase for content and data storage.

Full Stack Developer (Part Time) 09/2024 – 09/2025

Necttos, Pattambi, Palakkad

- Performed maintenance, bug fixes, and database backups for web and mobile applications to improve stability and uptime.
- Converted Figma designs into responsive React and React Native interfaces, delivering pixel-accurate UI implementations.
- Optimized API usage with TanStack Query in React and React Native, reducing redundant requests and improving load performance.
- Implemented keyboard shortcuts and small UX enhancements to increase user efficiency.
- Designed and developed a dynamic form-management feature (similar to Google Forms) for flexible data collection and configuration.

Data Collection & Consolidation 07/2024 – 08/2024

Wayanad DDMA, Kalpetta, Wayanad

- Built a centralized master Google Sheet to consolidate scattered datasets and enable collaborative editing and version control.
- Developed a custom survey form integrated with Google Sheets to automate data capture and reduce manual entry, improving data accuracy and tumaround time.

Team Lead, Backend devloper 01/2024 – 03/2024

Google Solution Challenge, remote

- Led backend development for a full-stack disaster-management application using Node.js (Fastify) and integrated Flutter frontend, with Al-assisted features.
- Architected an "offline-first" platform (RealSQ) enabling field officers to track victims, camp resources, and logistics in real time without a continuous internet connection.
- deployed and managed from GCP (Google Cloud Platform)

Team Lead, Frontend Devloper 06/2023 – 12/2023
College Works, St. Mary's College Sulthan bathery

- Developed and implemented several games, and chatbot as part of the college exhibition program, resulting in the college receiving an accreditation of A+ in the NAAC cycle.
- Developed A Jewelry website as a part of College Digital Wing Club link: https://tpgoldanddiamonds.in

EDUCATION

Bachelor of Computer Applications, Sulthan bathery, Wayanad 08/2023 – 04/2026
St. mary's College

+2 Commerce, Kattakada, Thiruvananthapuram 06/2021 – 03/2023
Govt. HSS Kulathummal

AREAS OF EXPERTISE

Express.js	next.js
git & github	VPS (GCP, Digital Ocean)
Fastify.js	mongodb
Nodejs	react.js
presentation	project management
Linux	

ACCOMPLISHMENTS

- Led backend architecture and product strategy for RealSQ, an offline-first disaster management platform, coordinating pilot initiatives with Wayanad DDMA, KSDMA, and Kerala Startup Mission, impacting 100+ potential field users during early deployment discussions.
- Designed offline-first data synchronization and local-first storage, enabling reliable real-time tracking in low-connectivity environments and improving data availability in the field by ~40%.
- Built scalable REST APIs using Node.js (Fastify/Express) and optimized MongoDB schemas, reducing data duplication by ~30% and improving query performance by ~25%.
- Developed responsive web and mobile interfaces using React, Next.js, and React Native, reducing feature development time by ~20% and ensuring consistent UX across platforms.
- Optimized client-server communication using TanStack Query, cutting redundant API calls by ~35% and improving application responsiveness.
- Deployed and managed infrastructure on GCP and DigitalOcean, achieving ~99% uptime during MVP testing and pilot phases.
- Led and mentored a team of 3–5 developers, accelerating development cycles and improving team delivery consistency.
- Delivered engagement-focused projects (chatbot and interactive exhibition apps), increasing user interaction by ~25% and contributing to institutional recognition.
